WORK PLAN APPROVAL - STOCKPILE PLACEMENT/DISPOSITION EVALUATION, STOCKPILES SP-1 THROUGH SP-11, FORMER C-6 FACILITY, BOEING REALTY CORPORATION, LOS ANGELES (FILE NO. 95-036)

Dear Mr. Mossman:

We have received the "Stockpile Placement Disposition Evaluation, Stockpiles SP-1 Through SP-11" (Workplan) prepared by Haley & Aldrich dated July 19, 2001. Regional Board staff verbally approved implementation of the Workplan during a meeting on July 20, 2001, and this letter documents that approval.

Soils stockpiled during demolition and investigation activities are temporarily stored onsite and this Workplan presents the methodology and rationale proposed to determine the suitability of these soils for reuse onsite. Soils with detectable levels of various chemicals that do not pose a threat to human health or degradation of the underlying groundwater are recommended for onsite reuse.

We have completed our review of the Workplan and concur with the proposed methodology and rationale and approve the onsite reuse of soils that meet the proposed criteria.

Please call me at (213) 576-6737 if you have any questions.

Sincerely,

John Geroch
Associate Engineering Geologist
Site Cleanup Unit I

California Environmental Protection Agency

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption
For a list of simple ways to reduce demand and cut your energy costs, see the tips at: <http://www.swrcb.ca.gov/news/echallenge.html>

Our mission is to preserve and enhance the quality of California's water resources for the benefit of present and future generations.
